CB-26P Fitting position

Audi A3 Turbo

Audi A3 1.8 Turbo Sport was fitted by Matt Rooke who first fitted CB-26P's to his BMW M3, this is his wife Emma's A3 and she says it's much more alive since the Ecotek unit was fitted.

The whole VW and Audi range seem to benefit considerably from the CB-26P

Not only does the device improve petrol consumption but throttle response and general 'driveability' is improved.

It also improves breathing at higher revs as the unit fits at the opposite end to the air intake. Audi owners always comment on how much freer revving the car is after fitting.
