CB-26P Fitting position

Jaguar V6 S Class

Jaguar S Class with the V6 2.6 litre engine. This superb car is fitted with the blue 'Combo' (Ecotek CB-26P and matching Pipercross Filter/Silencer combination) was tested a major Garage chain before supplying the device through their chain of Nationwide garages and Motor Factors.

The Right Hand Drive car has an unusually long servo pipe because the LHD cars for export have the servo on the other side - it does however fit neatly into the centre of the throttle body making it ideally positioned to exert maximum turbulence in the airflow.

The engine has narrow gauge plastic servo line which needs to be sleeved over with 10mm hose and four 14mm jubilee clips.
