CB-26P Fitting position

MG ZS180 V6

Here's the Ecotek on the MGZS 180 V6 that belongs to Peter from Fochabers in Scotland . A very simple and straightforward fitting.

Initial reports are that the engine has much better response and is more lively throughout the gears, making this already torquey and flexible engine even better. Too early to report on the MPG improvements as Peter is quite content exploring his new and improved V6 with extremely liberal use of the loud pedal!
