CB-26P Fitting position

Mitsubishi Evo 5

We also had some feedback via a dealer who fitted an EVO 5 driven by the Director of a Company who was so impressed that he got his whole fleet fitted - here is what he said and here is a copy of his original letter

" I would like to take this opportunity to express both our surprise and satisfaction following the fitment of the Ecotek valve to the Mitsubishi Evo 5. All too often products such as this are overstated and provide nothing near what is promised, this has to be the exception.

Since fitting the system the all round driveability of the car has improved particularly in terms of throttle response, we have also noticed an improvement in mileage.

As you are aware we have asked for the remainder of our fleet to have the system fitted and we will process our purchase order in the next few days.

Should you wish to pass this testimony on to other prospective customers then please feel free to do so, in fact we would be pleased to pass on our thoughts directly if required."
