CB-26P Fitting position

Peugeot 306 GTi

Mark Dow, who was Chairman of the Peugeot GTi Autosport Club, mailed us:

" I have just had an Ecotek CB-26P with optional Pipercross Breather Filter in anodised blue fitted to my 1999 306 GTi-6 by Star Performance, in Glenrothes Fife.

These guys have state of the art rolling road facilities are very friendly, helpful and most importantly know their stuff.

Fitted in 15 minutes (including adjustment/tuning) and with the benefit of 25 mile drive home I can feel a definite improved throttle response.

It is far too early to comment on fuelling and a BHP. Thankfully I cannot hear the burping noise it can make due to the breather so I am happy with my investment. The unit fitted is around £60.00 with the addition of £20.00 for the Pipercross. This part is not essential to the operation of your Ecotek but I think it looks great as well. Mark Dow"

Another owner commented:

"Just Fitted the Ecotek valve with filter to my 306 GTI-6 and I cannot believe this is the same car. I was expecting results but this far out weighs my expectations. The car feels to pull a lot smoother and on motorway driving I don't have to have my foot on the throttle as hard as before. The throttle response is now instant as before there was a slight flat spot. This thing really does work and surely is a must for any car. I just wish I had bought one earlier." Chris Johnson
