CB-26P Fitting position

Proton GTi 1.8 - Proton Satria

After reading various reports on the net about this product, both good and bad... I decided the only way I was going to really find out what the hype was about was to try this unit on my car.

My Proton Satria has already been given a Superchip, Free-Flow Exhaust and Blitz Induction Kit... so this product looked like it might just round it all off nicely.

The unit has only been installed for a few hours, but everything seems to be in working order.

I wouldn't know about the emissions or fuel economy yet, but it has had a positive effect on performance which I soon noticed (even after the other mods)."
