CB-26P Fitting position

Seat Leon Cupra

Here's Helen's Seat Leon Cupra (Cupra stands for Cup Racing) and this little beauty has 6 forward gears, traction control, the VW 20VT engine - she'll do 148 mph and 0-60 in 7.9 seconds - all this with A/C Climate control, 6 CD stack, 4 air bags and electric everything!

You'd have thought that there was little more to do but the Ecotek improves cold running, low end throttle response and Helen reckons she getting about 5% fuel economy.

She said: "I didn't think you could make this car much better but the Ecotek has certainly made a noticeable difference - and I get better economy - I'm very pleased.

The car was new but Kinghams of Croydon, who service it, fit the device didn't have any warranty concerns at all".
